SUITE OF SERVICES

From our translators to our state-of-the-art technology, we provide linguistic services which enable you to connect effectively and respectfully with Limited English Proficient communities. These are our eight most desired services.

TRANSLATION

Avantpage provides written translation services of documents, web pages, brochures, forms and other material. We offer industry-standard quality assurance, compliance support, a multi-step translation process, high-volume capabilities, quick turnarounds, and personal service.

DESKTOP PUBLISHING

Through Desktop Publishing (DTP), we format and recreate foreign language page design/layouts both for print and web use, without compromising the message and feel of the original material. We ensure that every detail of your file is reproduced accurately when presented in the target language.

WEBSITE LOCALIZATION

Website localization means adapting or creating content to ensure that your site looks, feels, and reads as though it were originally created for the target audience. As well as translation, this can involve revising graphic design, color schemes, symbols, and other visual elements. Avantpage's Technical Localization team provides engineering support to get your website localized swiftly, efficiently, and economically.

LINGUISTIC ASSET MANAGEMENT

Our Translation Memory (TM) software allows you to save specific terminology and style preferences for use on subsequent translations. Style guides and glossaries reflect your organization's personal preferences for translating certain words, phrases, etc. Knowing and fully understanding your translation preferences allows us to work quickly, accurately, and consistently to tailor translation pieces to your needs.

ALTERNATIVE FORMATS

We offer large print formatting, braille, voice-over, and additional alternative formats to ensure that your users can effectively engage with your documents. We help you meet the vital needs of your diverse target audiences.

OVER-THE-PHONE INTERPRETATION

We connect you with highly-trained, certified, and professional remote interpreters to address your telephonic needs in the languages you choose. These native speakers ensure that critical conversations are fully understood by all parties involved.

ADA DOCUMENT REMEDIATION

Avantpage can help remediate your written documents to comply with the Americans with Disabilities Act accessibility requirements. Adjusted elements can include text layers, color choices, and alternative text, and our teams work with yours to determine needs on a case by case basis.

TRANSCRIPTION

Our teams can provide verbatim or non-verbatim time-stamped transcriptions of your audio files. If desired, we'll then take that written transcript and translate it into your target languages.
